Welcome to Indiana Beach!

Welcome to Indiana Beach Amusement & Water Park Resort! Nestled on the shores of Lake Shafer in Monticello, Indiana, at Indiana Beach, we strive to make your time with us enjoyable and hope that this Safety & Accessibility Guide will assist you during your visit. Please ask a uniformed team member for assistance or visit Guest Relations located inside the park if you have additional questions! Again, welcome and we hope you enjoy your visit!

A Note Regarding Safety

We are committed to the safety of all our Guests and team members. Safety is a partnership between the park and you, our Guests. Please observe all warnings outlined in this guide and other rules and safety information provided to you by our team members. The information in this document was updated before the start of the season. Information in this guide is subject to change.

If you suspect your health could be at risk for any reason, or you could aggravate a pre-existing condition of any kind, **DO NOT RIDE**. Specific warnings and restrictions are listed at each ride within this guide.

All Guests must be able to demonstrate a willingness and ability to comply with verbal and written rider requirements. Guests unwilling or unable to follow instructions or comply with directions given, will not be allowed to ride.

Indiana Beach reserves the right to make the final determination on a Guest's ability to ride and may deny Guest access if Management deems it unsafe for the individual. Any Guest who does not fit properly in the ride restraint or vehicle will not be permitted to ride.

General Information

Parking

Parking is available for Guests with disabilities in the main parking lot located at the north end of the park on a first come, first serve basis. A valid disabled persons parking placard or license plate must be displayed at all times while parked in designated accessible parking areas.

Family and ADA Restrooms

Family restrooms with ADA accessibility are available near the Tilt-a-Whirl ride just inside the waterpark and at the south end of the park under the Skyride platform.

First Aid

First aid is located under the Cornball Express and near Dr. Frankenstein's Haunted Castle. If you require medical assistance, please ask for help from any of our uniformed team members and they will contact first aid for you.

Pregnancy

Pregnant Guests, or Guests who believe they may be pregnant, should follow all rules and guidelines listed for each ride. Guests who are pregnant shall not ride an attraction that specifically lists pregnancy as a rider restriction.

Segway, Hoverboards, and Wheelchairs

Segway, Hoverboards, or other two-wheeled, self-balancing electric vehicles are not permitted within Indiana Beach property. Limited numbers of Wheelchairs and Electric Convenience Vehicles (EVC) are available for rent on a first-come, first-served basis inside Guest Relations. Golf carts are not permitted in the boardwalk or midway areas at any time.

Guests are permitted to use their own EVC or wheelchairs within the park.

Outside Food

Indiana Beach does not allow outside food inside our park. Guests with special dietary needs will be allowed to bring limited portions into the park to accommodate their needs for the day. Please see a team member at the gate for assistance.

Cameras

Cameras or video equipment, including cell phones, are not permitted on most attractions; the exception being the Shafer Queen. All other attractions prohibit the use of these items while the ride is in motion. Guests are instructed to place all loose articles in a park locker or leave them with a non-rider. Please remember, Guests must have written permission to use photographs and/or recordings of any aspect of the park for commercial broadcasting, advertising, marketing, or publishing in any medium. The use of a waterproof sport camera while in any water attractions is **NOT** permitted. These are considered attractions and loose articles are not allowed.

Oxygen Tanks and Devices

Oxygen tanks and machines are not permitted on all rides. For the safety of all Guests, oxygen tanks and small personal oxygen machines are permitted on the following rides only:

- Shafer Queen
- CP Huntington "Train"
- Giant Gondola Wheel

Oxygen machines that can be secured to you in a similar manner as a purse or bag will also be permitted on the Antique Autos.

Oxygen tanks and devices must be small enough to be secured safely between the rider's feet or held in their lap and secured to their person while riding. Devices that do not meet these requirements will not be permitted on any ride or attraction.

Service Animals

Trained service animals are welcome at our park. Service animals are defined as any dog or miniature horse that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. The work or tasks performed by a service animal must be directly related to the individual's disability (ADA Title II and III). Dogs whose sole function is to provide comfort or emotional support do not qualify as service animals. Miniature horses that have been individually trained to do or perform tasks for people with disabilities will qualify as service animals.

Service animals must be housebroken and remain on a leash or harness or under control of the individual they assist at all times. Guests whose service animal demonstrates aggressive or uncharacteristic behavior towards a Guest or team member will be directed to remove the animal from the park.

We welcome service animals in most areas of our park. Many of our rides are not equipped to accommodate service animals, and the animal will not be allowed to ride at most attractions. A member of the party must be available to stay with the animal while the Guest rides.

The park has a service animal relief area located in the area behind the Big Flush water slide at the north end of the park and on the island near the train station at the south end of the park. Owners are responsible for clean-up and disposal of their animal waste.

Exit Boarding Pass

Exit Boarding Passes are available to provide access to park attractions for Guests with limited mobility or other qualifying circumstances and not to bypass another Guest waiting in the standard queue. Guests who qualify for this access should visit Guest Relations inside the park to obtain one.

Exit Boarding Passes will allow access to the qualifying Guest and up to one other riding companion. If the Guest's party is larger than two people, the rest of the party will need to enter the attraction through the standard queue. The Guest issued the exit pass must ride the Guest companion to use the alternative entry and bypass the standard queue.

Guests who obtain an Exit Boarding Pass must still meet all safety and rider requirements to participate in any ride or attraction within the park. Entry, exit, and transfer to the ride must be accomplished independently by the Guest or with assistance from a member of the Guest's party. Indiana Beach team members are not trained to lift, carry, or assist with transferring of a Guest and are not permitted to assist a Guest on or off a ride. Not all rides have alternative access; please refer to this guide, Guest Relations, or a team member if you have questions.

Ride Evacuations

In some instances, there may be a need to evacuate a ride from a location other than the standard load and unload position. Guests may need to negotiate stairs from the highest points of the ride and down steeply inclined walkways. Guests requiring assistance during a ride evacuation may be escorted last to expedite the evacuation process. Persons with limited mobility should be accompanied by a companion capable of helping to evacuate them during a ride shut down if needed. Please ask about specific procedures prior to boarding a ride.

Ride Information

Theme and waterpark attractions will expose riders to forces, speeds, and other intense elements that may cause distress or injury to individuals with pre-existing conditions. As a rider, you should be in good health and heed all warning signs and attendant instructions.

To experience all rides, Guests must be able to maintain the proper riding position throughout the ride, including maintaining control of upper torso, head, and neck. Riders must meet the ride requirements and appropriately utilize the restraint systems, including lap bars, shoulder harnesses, and seat belts as indicated.

Approved for the 2025 season.

Guests with casts, braces, and prosthetics may be restricted from riding certain rides where these items may present a hazard to the Guest or other participants. Some rides may require a Guest to remove a prosthetic, brace, or assistive device to ride.

Definitions

Rider requirements and rules are listed at every ride or attraction entrance. Indiana Beach uses the following terms:

Responsible Adult	A person who meets all ride requirements and is at least 18 years of age or older. A responsible adult may be required to help the Guest while loading, unloading, and while a ride is in motion. This person must also be able to assist the party they are responsible for in the event of a ride evacuation.
Functioning Arm	A full arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to grip or brace.
Arm Remnant	A partial arm up to the elbow joint.
Functioning Leg	A full leg with a foot and the ability to control the extremity.
Leg Remnant	A partial leg up to the knee joint or beyond.

Rider Responsibility

As a Guest at an amusement park, you have a duty to exercise good judgement and act in a responsible manner while participating on a ride or attraction and to obey all verbal and written warnings and instructions. The State of Indiana Administrative Code Title 685 Section 1-2-4 requires the following of amusement park patrons:

- Patrons have a duty to not participate in or on any amusement ride, device, or attraction when under the influence of drugs or alcohol.
- Patrons have a duty to effectively use all ride or device safety equipment provided.

Air Crow

Moderate Ride

Ride Description:	An exhilarating circular swing ride featuring a fin that allows Guests to control their swinging motion.
Height Restrictions:	Riders must be 44" tall to ride alone. Riders between 36" and 44" tall may ride if accompanied by a responsible adult. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with food) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Casts are permitted if the rider can sit correctly within the ride vehicle.
Ride Access:	Guests using a wheelchair should enter through the ride exit.

All American Triple Loop

Thrill Ride

Ride Description:	An exciting steel coaster that combines high-speed curves and drops in a compact space.
Height Restrictions:	Riders must be 59" tall to ride. Riders must not exceed 77" tall.
Physical Requirements:	Riders must be able to independently maintain an upright seated position and have upper body, neck, and head control. Riders must possess two complete arm extremities (a naturally formed and functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip). Riders must possess two complete leg extremities (a naturally formed leg with a foot). Prosthetic devices are not permitted.
Casts:	Arm and leg casts are not permitted.
Ride Access:	Guests using a wheelchair should enter through the ride exit.

Antique Autos

Mild Ride

Ride Description:	A leisurely car ride for the whole family over the water.
Height Restrictions:	Riders must be 44" tall to ride alone. Riders less than 44" tall may ride if accompanied by a responsible adult. Riders must be 44" tall to drive and steer the car. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle.
Casts:	Casts are permitted if the rider can sit correctly within the ride vehicle.
Ride Access:	Guests using a wheelchair should enter through the ride exit.

Beach Buggies

Mild Ride

Ride Description:	An exciting fire-rescue-themed circular ride.
Height Restrictions:	Riders under 54" tall may ride provided they can sit up by themselves. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Casts are permitted on the ride if the rider can sit correctly within the ride vehicle.
Ride Access:	Guests using a wheelchair should enter through the ride exit.

Boardwalk Balloons

Mild Ride

Ride Description:	Family balloon-themed ride featuring eight ride vehicles that spin individually by riders
Height Restrictions:	Riders must be at least 36 inches to ride. Riders are not permitted to sit on the lap of another rider. Only 1 adult permitted per Balloon
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Riders wearing an arm cast are permitted on the ride if the rider can sit correctly within the ride vehicle. Riders wearing a leg cast are not permitted on the ride.
Ride Access:	Guests using a wheelchair should enter through the ride entrance.

Boogie Boats

Mild Ride

Ride Description:	A leisurely moving circular boat ride.
Height Restrictions:	Riders under 54" tall may ride provided they can sit up by themselves. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Casts are permitted on the ride if the rider can sit correctly within the ride vehicle.
Rider Access:	Guests using a wheelchair should enter through the ride exit.

Big Flush

Moderate Ride

Ride Description:	A fast and fun water coaster adventure.
Height Restrictions:	Riders must be 44" tall to ride alone. Riders 42" to 44" tall may ride if accompanied by a responsible adult. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete extremity (a naturally-fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Prosthetics are not allowed on the ride. Riders must step up and down into an elevated ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride. Maximum weight is 300 pounds per ride vehicle.
Casts:	Riders wearing a cast are not permitted to ride.

Cap'n Crow's Bumper Boats

Moderate Ride

Ride Description:	Aye Aye Captain. Enjoy the fun and excitement of piloting your own boat while you cruise the lagoon searching for other Lan lubbers to collide into. It crash and splashes fun right on the famous boardwalk.
Height Restrictions:	Riders must be 44" tall to ride alone. Riders 40" to 44" tall may ride if accompanied by a responsible adult. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete extremity (a naturally-fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully-formed leg with a foot) to ride. Prosthetics are not allowed on the ride. Riders must step up and down into an elevated ride vehicle.
Casts:	Riders wearing a cast are not permitted to ride.
Ride Access:	Guests using a wheelchair should enter through the exit of the ride.

Cornball Express

Thrill Ride

Ride Description:	A thrilling high-speed roller coaster ride that features exciting drops, twists, and turns.
Height Restrictions:	Riders must be 46" tall to ride alone. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete extremity (a naturally-fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Arm prosthetics are not allowed on the ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Riders wearing a cast are not permitted to ride.
Ride Access:	Riders will enter using the Elevator located under the entrance stairs.

CP Huntington "Train"

Mild Ride

Ride Description:	A relaxing train ride that provides Guests with a fun alternative for transportation to the south end of the park.
Height Restrictions:	Riders must be 44" tall to ride alone. Riders less than 44" tall may ride if accompanied by a responsible adult provided; they are able to sit up by themselves. Riders are not permitted to ride on the lap of another rider.
Physical Requirements:	Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Riders wearing a cast are permitted on the ride if the rider can sit correctly within the ride vehicle.
Ride Access:	Guests using a wheelchair should enter through the same entrance.

Crazy Carp

Mild Ride

Ride Description:	An exuberant water-themed adventure that rotates in a circular motion while also gently rising and falling as if riding a real whale.
Height Restrictions:	Riders of any height may ride provided they are able to sit up by themselves. Riders are not permitted to ride on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride. Persons pregnant or with physical impairments should view ride for potential risks before riding.
Casts:	Riders wearing a cast are not permitted on the ride.

Cyclone

Thrill Ride

Ride Description:	Take a walk-through Dr. Frankenstein’s Castle to see what crazy experiments he is performing.
Height Restrictions:	Guests of any height may walk through the castle provided they are able to walk by themselves. Guests may not be carried by another Guest.
Physical Requirements:	Riders must be able to walk a long distance, including up and downstairs. People sensitive to strobe lights should not participate.
Casts:	Arm casts are allowed in the castle. Leg casts that require the use of crutches are not permitted in the castle.

Den of Lost Thieves

Mild Ride

Ride Description:	An electric-powered dark ride that features an interactive shooting gallery.
Height Restrictions:	Riders must be 44” tall to ride alone. Riders less than 44” tall may ride if accompanied by a responsible adult. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride. Maximum weight is 350 pounds per ride vehicle.
Casts:	Casts are permitted if the rider can sit correctly within the ride vehicle.
Ride Access:	Guests using a wheelchair should enter through the entrance to the left of the operator.

Dodgem

Moderate Ride

Ride Description:	An exciting fast-moving bumper car experience.
Height Restrictions:	Riders must be 48” tall to ride alone. Riders 44” to 48” tall may ride if accompanied by a responsible adult. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Riders wearing a cast are not permitted on the ride.

Double Shot

Thrill Ride

Ride Description:	An exciting rapid vertical ascent and descent amusement ride.
Height Restrictions:	Riders must be 52" tall to ride. Guests under 52" tall are not permitted on the ride. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip), one complete leg extremity (a naturally fully formed leg with a foot) and one leg remnant (a naturally formed leg to the knee or beyond) to ride. Prosthetics are not permitted. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Riders wearing a cast are not permitted on the ride.
Ride Access:	Guests using a wheelchair should enter through the exit of the ride.

Dr. Frankenstein's Haunted Castle

Moderate Attraction

This is a pay-as-you-go attraction!

Ride Description:	Take a walk-through Dr. Frankenstein's Castle to see what crazy experiments he is performing.
Height Restrictions:	Guests of any height may walk through the castle provided they are able to walk by themselves. Guests may not be carried by another Guest.
Physical Requirements:	Riders must be able to walk a long distance, including up and downstairs. People sensitive to strobe lights should not participate.
Casts:	Arm casts are allowed in the castle. Leg casts that require the use of crutches are not permitted in the castle.

Falling Star

Moderate Ride

Ride Description:	A gravity-defying platform ride that rocks Guests through a 360° arc.
Height Restrictions:	Riders must be 44" tall to ride alone. Riders 36" to 44" tall may ride if accompanied by a responsible adult. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip), one complete leg extremity (a naturally fully-formed leg with a foot) and a leg remnant (a naturally formed leg to the knee or beyond) to ride. Arm prosthetics are not allowed. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Riders wearing a cast are not permitted on the ride.
Rider Access:	Guests using a wheelchair should enter through the exit of the ride.

Flying Bobs

Mild Ride

Ride Description:	A high-speed thrill ride designed to provide an exciting experience by spinning guests through a unique environment.
Height Restrictions:	Riders must be 48" tall to ride.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
Casts:	Riders wearing a cast are not permitted on the ride.
Rider Access:	Guests using a wheelchair should enter through the ride exit.

Giant Gondola Wheel

Mild Ride

Ride Description:	A towering gondola ride that leisurely raises guests through a 360-degree arc and offers them a unique view of the park.
Height Restrictions:	Riders must be 44" tall to ride alone. Riders less than 44" tall may ride if accompanied by a responsible adult. Riders are not permitted to sit on the lap of another rider.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip) and one complete leg extremity (a naturally fully formed leg with a foot) to ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle.
Casts:	Casts are permitted on the ride if the rider can sit correctly within the ride vehicle.
Rider Access:	Guests using a wheelchair should enter through the entrance to the right of the operator.

Hoosier Hurricane

Thrill Ride

Ride Description:	A high-speed, thrilling wooden roller coaster ride that sends Guests speeding down the length of the boardwalk and back again.
Height Restrictions:	Riders must be 48" tall to ride.
Physical Requirements:	Riders must possess one complete arm extremity (a naturally fully-formed-and-functioning arm with the ability to be flexed at the elbow and a minimum of three full fingers with the ability to hold on with a firm grip), one complete leg extremity (a naturally fully formed leg with a foot) and a leg remnant (a naturally formed leg to the knee or beyond) to ride. Arm prosthetics are not allowed on the ride. Riders must step up and down into an elevated ride vehicle and will need to transfer from a wheelchair to the ride vehicle. Due to the design of the seating and ride restraints, some larger-bodied riders may not be able to ride.
